The Trust recorded gross revenue of RM49.828 million for the year ended 31 December 2009, an increase of 8%, compared to the preceding year. The increase in gross income was mainly due to the increase in rental income as a result of the uplift in rental rates in Menara HLA and HP Towers.

The total income after taxation for the year is RM35.826 million, which is inclusive of the unrealised fair value adjustment of RM5.770 million generated from the revaluation of the investment properties.

For the year ended 31 December 2009, the realised and distributable net income was RM30.056 million, representing an increase of 8% as compared to the preceding year. The growth in realised and distributable net income was mainly due to the higher rental income and lower interest expense brought about by the lower interest rate.

B2. Changes in State of Affairs

There were no material changes in the state of affairs of the Trust for the quarter under review

B3. Changes in Portfolio Composition

As at 31 December 2009, Tower REIT's composition of investment portfolio is as follows:

The occupancy and rental rates remained stable with slight adjustments in the occupancy and rental rates but there were more investment transactions during the quarter under review. The gradual stabilisation of the economic condition has provided support to the office property market.

B7. Market Prospects

The office property market is expected to stabilise with the government's initiatives in stimulating the economy with more liberalisation of the business environment. The overall occupancy and rental rates will depend on the strength of absorption of new office supply while the growing interest in investment grade buildings will support the capital value.

GLM REIT Management Sdn Bhd, the Manager of Tower REIT, announces that the unaudited net income for the year ended 31 December 2009 of RM35.826 million has exceeded the projected results for the same period of RM21.782 million as disclosed in the Circular, by RM14.044 million or 64.5%.

The positive variance of RM14.044 million was partly attributed to the surplus of RM5.770 million arising from the revaluation of the three investment properties of Tower REIT, namely, Menara HLA, HP Towers and Menara ING, in compliance with the fair value model stipulated in the Financial Reporting Standards 140 and paragraph 10.03 of the Securities Commission Guidelines on Real Estate Investment Trusts.

Excluding the surplus from fair value adjustments of investment properties of RM5.770 million, the unaudited realised and distributable net income for the year ended 31 December 2009 of RM30.056 million exceeded the projected results of RM21.782 million as disclosed in the Circular, by RM8.274 million or 38.0%. This variance was mainly due to the following:-

- (i) Total revenue increased by RM6.643 million mainly due to the higher than expected property revenue resulting from the higher rental rates of Menara HLA and HP Towers as well as higher carpark income; and
- (ii) Borrowing cost was lower than the projected figure by RM2.240 million due to the lower than expected interest rate.

Please refer to the attached income statement for further details on the variance of the unaudited results for the year ended 31 December 2009 against the projected results for the same period as disclosed in the Circular.
